PROFESSIONAL SUMMARY

Third-year B.Tech Information Technology student at VIT Pune with a strong foundation in Python, SQL, relational databases, and data structures. Experienced in developing AI-powered applications and working with data preprocessing, dataset analysis, and database-driven systems through academic projects. Interested in data engineering, data quality, data integration, and building reliable, scalable data solutions for enterprise and financial domains.

EDUCATION

Vishwakarma Institute of Technology (VIT), Pune
Bachelor of Technology – Information Technology
CGPA - 9.0
Expected Graduation: 2028

MET Institute of Technology, Polytechnic
Diploma in Computer Science – 2025
Percentage - 94.11%

TECHNICAL SKILLS

- Programming Languages : Python, SQL, Java, C++
- Databases & Data Management: MySQL, Relational Databases, DBMS, SQL Queries, Joins, Aggregations, Data Validation
- Data Engineering Concepts: Data Preprocessing, Data Transformation, Data Quality Checks, ETL/ELT Fundamentals
- Computer Fundamentals: Data Structures & Algorithms, Operating Systems, Computer Networks, Software Engineering, Object-Oriented Programming
- Tools & Platforms: Git, GitHub, Linux, VS Code,Jupyter Notebook
- Familiar With: C, Docker, Power BI, OpenCV, ALML, Data Visualization

WORK EXPERIENCE

Web Developer Intern — NPIT Solutions

- Developed responsive and scalable web interfaces using ReactJS, CSS, JavaScript, Bootstrap and SQL.
- Worked with SQL to support database-driven web application functionality.
- Collaborated with development teams to deliver customized web solutions.
- Recognized with Best Web Developer Intern Award for my Project.

PUBLICATIONS & RESEARCH

Intelligent AI-Based Framework for Comprehensive Risk Identification and Management in Construction Projects - CSSP 2026 Conference Publication

- Published and indexed in Scopus (2026).
- Developed an AI-based framework for identifying and managing risks in construction projects.
- Link : https://thegrenze.com/abstract/journal/7908

TECHNICAL PROJECTS

1. FinVerify: Financial Data Verification System | Python, PostgreSQL, FastAPI

- Built a data verification pipeline using Python to parse financial documents, integrate SEC EDGAR/XBRL data, and validate financial calculations through deterministic processing.
- Designed relational database models using PostgreSQL and SQLAlchemy for structured data storage, discrepancy tracking, and auditable verification certificates, with Redis caching for efficient data access.

2. AI Career & Resume Intelligence | Python, FastAPI, React, MongoDB, NLP, Machine Learning

- Developed an AI-powered platform for resume analysis and job matching using NLP, TF-IDF, and semantic embeddings.
- Implemented skill-gap analysis, explainable job-match scoring, and personalized career recommendations with learning roadmaps.

LEADERSHIP & ACHIEVEMENTS

- MET RATNA'25 Award - Institute Topper (Entire Polytechnic)
- PICT Finalist - In Top 10 for Techfiesta'26
- SYNERGY-25 Project Competition Finalist - Top 30 finalist among 650+ participants
- Project Morpheus 2k26 Hackathons Finalist
- Hackspiration'26 Top 30 Finalist of 1100 registration
- Vice-President, SPACE Committee
- Organized 5+ technical events at college level
- Ex-Member, Institution of Engineering India (IEI)
- Coordinator – TATA Company Campus Placement Season (C2IC-2024)
- IIT NPTEL Certification – Database Management Systems
- IIT NPTEL Certification – Java Programming
